**Per CDC, symptoms include fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, and diarrhea. This list of symptoms can change as more is learned about COVID-19, and CDC updates this list on its website at https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html.

**Per CDC, among adults the risk for severe illness from COVID-19 increases with age, with older adults at highest risk. People of any age with the following conditions are at increased risk of severe illness: chronic kidney disease; chronic obstructive pulmonary disease; weakened immune system from solid organ transplant; obesity (body mass index of 30 or higher); serious heart conditions such as heart failure, coronary artery disease, or cardiomyopathies; Sickle cell disease; and Type 2 diabetes mellitus. Children who are medically complex, who have neurologic, genetic, metabolic conditions, or who have congenital heart disease are at higher risk for severe illness from COVID-19 than other children. People who need to take extra precautions include racial and ethnic minority groups; people experiencing homelessness; women who are pregnant or breastfeeding; people with disabilities; and people with developmental and behavioral disorders. More information is available at https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/index.html.
