

# Protecting yourself against COVID-19

Vaccination schedules

## Vaccine available for recipients 12 or older Pfizer/Comirnaty adult/adolescent formulation

## Vaccines available for recipients 18 or older Moderna

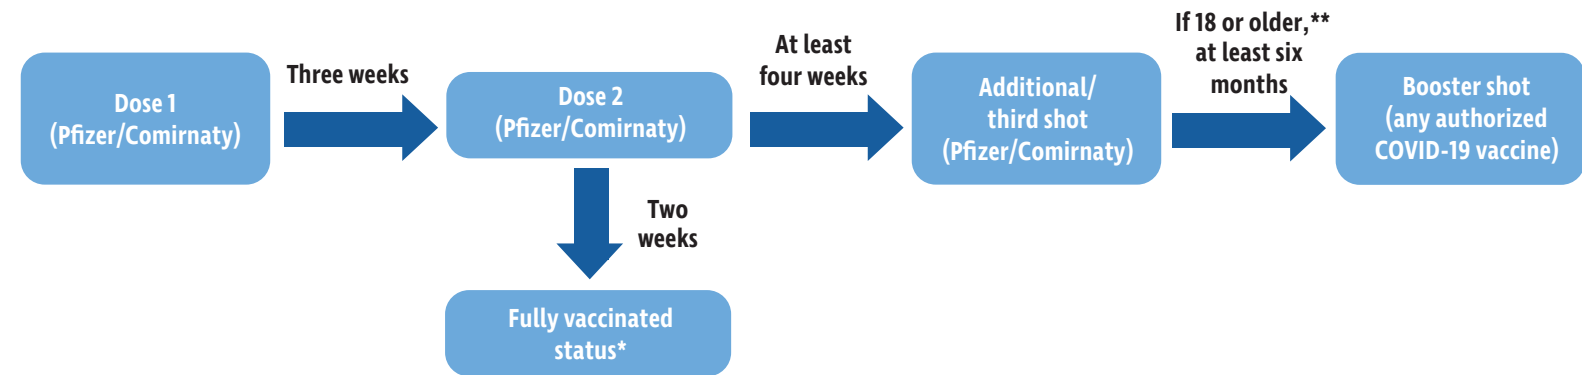

## Johnson & Johnson

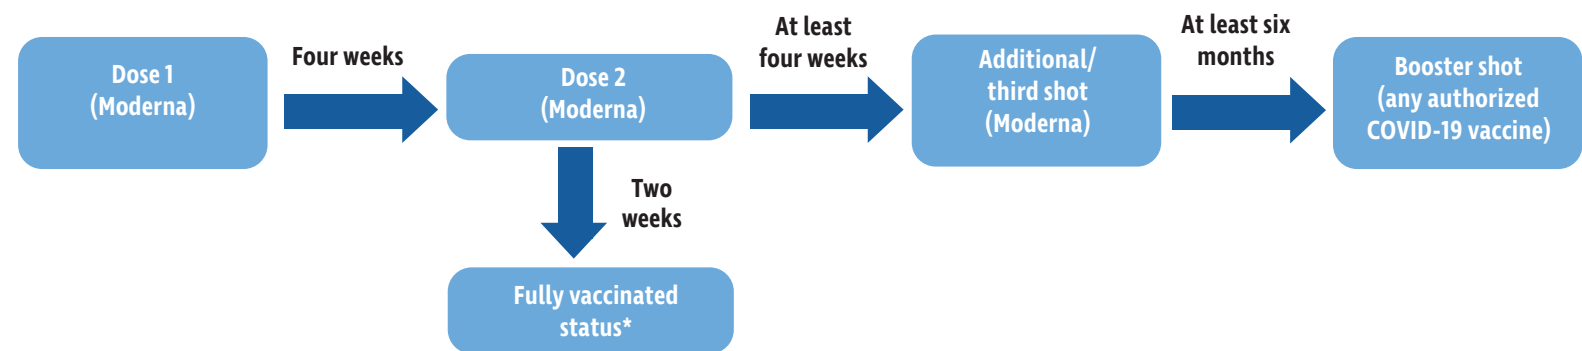

## Vaccine available for recipients ages 5-11 Pfizer pediatric formulation

## Vaccine available for recipients 12 or older with weakened immune systems Pfizer/Comirnaty adult/adolescent formulation

## Vaccine available for recipients 18 or older with weakened immune systems Moderna

\*A person who is "fully vaccinated" against COVID-19 has full protection against the disease. Recipients are considered fully vaccinated two weeks after receiving the single-dose Johnson & Johnson vaccine or two weeks after receiving the second dose of a two-dose vaccine (Moderna or Pfizer/Pfizer pediatric/Comirnaty). Because protection wanes over time or can be effected by certain immune system deficiencies, certain people are advised to receive a third and/or booster dose.

\*\*Booster doses are not currently authorized for anyone under the age of 18.
