Health Sciences, College of Public Health**

Ecology Epidemiology and Population Health Co-director IDI

Senior Lecturer, College of Medicine, Griffith University, Queensland Australia

Adjunct Assistant Professor, Mel and Enid College of Public Health, University of Arizona

Understand the Hazard – Envision the Options

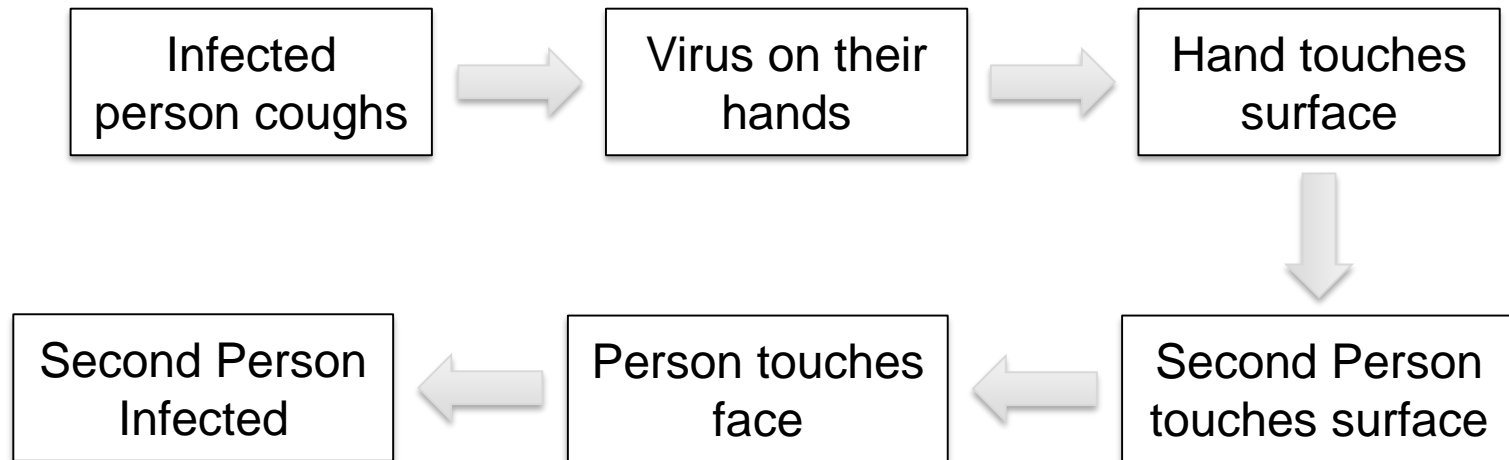

- ▶ How does the **virus** transmit to you?
 - Droplets
 - Surfaces
 - Cross contamination
- ▶ How does this happen?
 - Viruses must be coughed/sneezed
 - Viruses contact mucous membranes
 - ▶ Droplet contact
 - ▶ Hand-to-surface-to-face
 - ▶ Close contact with infected person
 - ▶ Less than 6 – 10 feet for more than 5 minutes

Understand the Environment – Envision the Options

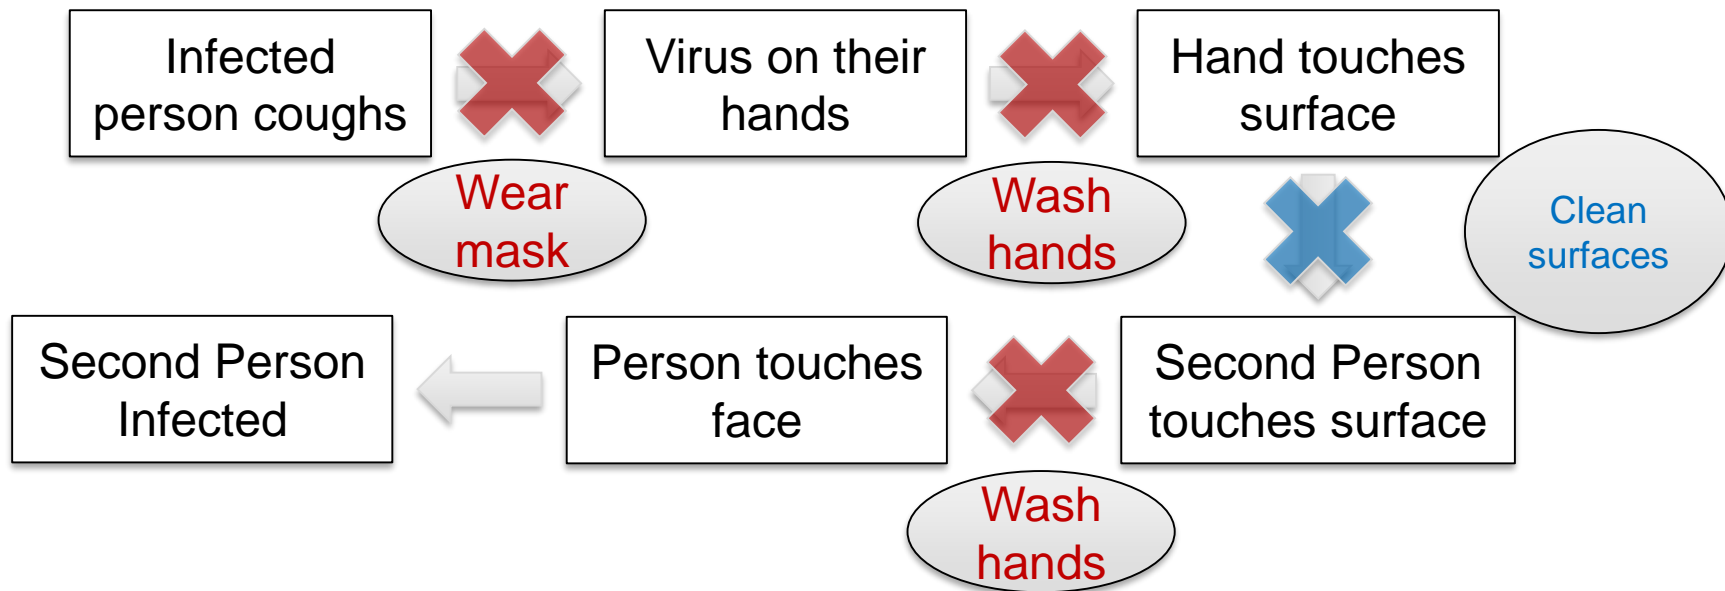

Infection Process

Understand the Environment – Envision the Options

Interrupted Infection Process

Model the Environment – Support the Decisions

- ▶ A model is a faithful representation of the real world
- ▶ Allows us to consider “what ifs”
- ▶ Supports and gives decision options
