# COVID - 19 | Key Indicators

Last Updated: 05-24-21

Other states do not send death certificates to ODH's Bureau of Vital Statistics on a regular schedule and therefore fluctuations will be reflected in reported mortality data. Deaths are assigned to their appropriate date of death.

<b>Cases</b>	Total Reported Cases <b>1,097,866</b>	Last 24 Hour Reported Cases Change <b>566</b>	21 Day Reported Case Average <b>1,041</b>	21 Day Trend 
<b>Hospitalizations</b>	Total Reported Hospitalizations <b>58,678</b>	Last 24 Reported Hours Hospitalizations Change <b>88</b>	21 Day Reported Hospitalization Average <b>97</b>	21 Day Trend 
<b>ICU Admissions</b>	Total Reported ICU Admissions <b>8,062</b>	Last 24 Hours Reported ICU Admissions Change <b>8</b>	21 Day Reported ICU Admission Average <b>11</b>	21 Day Trend 
<b>Deaths</b>	Total Reported Deaths <b>19,709</b>	Last 24 Hours Reported Deaths Change <b>0</b>	21 Day Reported Death Average <b>20</b>	21 Day Trend 

All dates are based when an indicator is reported and will not match data in other COVID-19 dashboards provided by the Ohio Department of Health. All other dashboards are based on onset date, date of hospitalization, or date of death.

Mortality data is verified by coded death certificate information received from the National Center for Health Statistics, and can take some time to receive. This information is not available daily, and is updated approximately twice per week as data is received.

\*\*Starting 03/02/2021, the COVID-19 death data will be reported from the Electronic Deaths Registration System. The "Last 24 Hour Reported Change", "21 Day Reported Average" and "21 Day Trend" metrics will initially be incomplete but will continue to be updated.
