v-safe ™ health checker

v-safe ™ for COVID-19 helps you monitor your health after getting a COVID-19 vaccine. v-safe ™ notifies you if you develop any new symptoms linked to COVID-19. v-safe ™ can be used to report symptoms up to 4 weeks after your second dose of COVID-19 vaccine.

How to use v-safe ™

1. Launch v-safe ™ on your smartphone.
2. Follow the prompts to enter your health information.
3. Track your symptoms over time.

Visit v-safe.cdc.gov for more information.

v-safe ™ is a mobile health application developed by the Centers for Disease Control and Prevention (CDC) to help you monitor your health after getting a COVID-19 vaccine.
v-safe is now available for COVID-19 patients.

**What is v-safe?**

v-safe is a digital tool that allows COVID-19 patients to report their symptoms in real-time through a secure, confidential and anonymous platform.

**Why use v-safe?**

v-safe helps public health officials understand how COVID-19 is affecting people, which can help inform future recommendations to help curb the spread.

**How to use v-safe?**
