COVID-19 Information and Checklist for K-12 Schools
Protecting Against COVID-19

Governor Mike DeWine has closed all school buildings in Ohio, including preschool programs licensed by the Ohio Department of Education, for three weeks beginning at close of school on Monday, March 16, 2020. Internet- or computer-based schools should continue operations according to their regular calendars.

Ohio Department of Health Director Amy Acton, M.D., MPH, strongly recommends that all K-12 schools immediately take the following actions:

- Districts and schools should make a good-faith effort to provide education through alternative means within their available capabilities to support continued learning outside of school. Districts and schools may create e-learning plans, including digital and distance learning options. The use of blizzard bags beyond the normally allowed three days is acceptable.

- Allow as many employees as possible to work from home by implementing policies in areas such as teleworking and video conferencing. The administration of each school should determine the appropriate level of access to the school during the closure.

- Schools may continue to support students by providing breakfast and lunch in non-congregate settings. Review the Ohio Department of Education’s School Breakfast and Lunch document for more information about receiving reimbursement for meals served during the closure.

- Districts offering instruction to all students, including via alternate delivery models like online learning or distance learning, are required to provide students with disabilities special education services. If a student with a disability cannot access the alternate delivery models being offered to general education students, the district should consult with the student’s parents and/or caregivers to determine the needs of the student and identify the most appropriate means for meeting those needs during the closure period.

For more information, visit: coronavirus.ohio.gov
Schools should take this opportunity to review the status of each student in grade 12 to determine the extent to which the student has met graduation requirements for the class of 2020. Schools are recommended, to the extent possible, to create plans to help each student complete these requirements during the remainder of the school year, both during the closure period (as practicable) and at such time as school may resume.

Continue to provide information to help staff and students' families understand COVID-19 and the steps they can take to protect themselves. Discourage older students and staff from gathering or socializing on school grounds or sites outside school, such as a friend's house, restaurants, or shopping malls.
