Coronavirus Disease 2019

COVID-19 Checklist for Talking To Kids Responding to COVID-19

The COVID-19 pandemic can be overwhelming for parents and concerning to children. Ohio Department of Health Director Amy Acton, MD, MPH, recommends that parents and others who work with young people strive to help them feel understood, empowered, and hopeful. She offers the below guidelines.

	Remind children that doctors and healthcare workers are learning as much as they can about the virus as quickly as possible and are doing what they can to keep everyone safe.
	Reassure children that they are safe. Let them know it is OK if they feel upset.
	Help children label strong emotions and understand how those emotions might drive them to act in unhelpful ways.
$\overline{\checkmark}$	Share with them how you deal with your own stress so that they can learn how to cope. Help them discover what works for them to address stress (activities that build skills versus activities that help them escape).
$\overline{\checkmark}$	Limit children's exposure to media coverage of the pandemic. Discuss what they are hearing on the news or through social media and correct any misinformation or rumors you may hear. Keep young children away from frightening images they may see on TV, social media, computers, etc.
	Discuss ways to maintain a sense of structure. See <u>Setting a New Routine</u> .
	Ask children about their ideas for connecting remotely with friends and family members. Encourage contact through electronic communications, phone calls, letters, and other safe ways to engage.
\checkmark	Discuss examples of people, including young people, who are trying to help others during the pandemic or sharing messages of hope. Participate in a community response, such as chalking the sidewalk, creating rainbows, or hanging hearts in windows. Set a good example by showing empathy and support to those who are ill.
\checkmark	Remind children that lifestyle changes and stressors are temporary and that some sense of normalcy will return when it is safe.

Discuss with children the importance of washing hands often, coughing into a tissue, and getting enough sleep. Inform them of COVID-19 symptoms.

For additional information, visit coronavirus.ohio.gov.

For answers to your COVID-19 questions, call 1-833-4-ASK-ODH (1-833-427-5634).

Your mental health is just as important as your physical health. If you or a loved one are experiencing anxiety related to the coronavirus pandemic, help is available 24 hours a day, seven days a week. Call the COVID-19 CareLine at 1-800-720-9616.
