Reported new diagnoses of HIV infection include persons with a diagnosis of HIV (not AIDS), a diagnosis of HIV and an AIDS diagnosis within 12 months (HIV & later AIDS), and concurrent diagnoses of HIV and AIDS (AIDS) who were residents of Ohio at time of initial diagnosis.

Area-based poverty level is based on census tract of residence at time of initial diagnosis. Cases diagnosed while in a correctional facility are included in the county where the correctional facility is located.

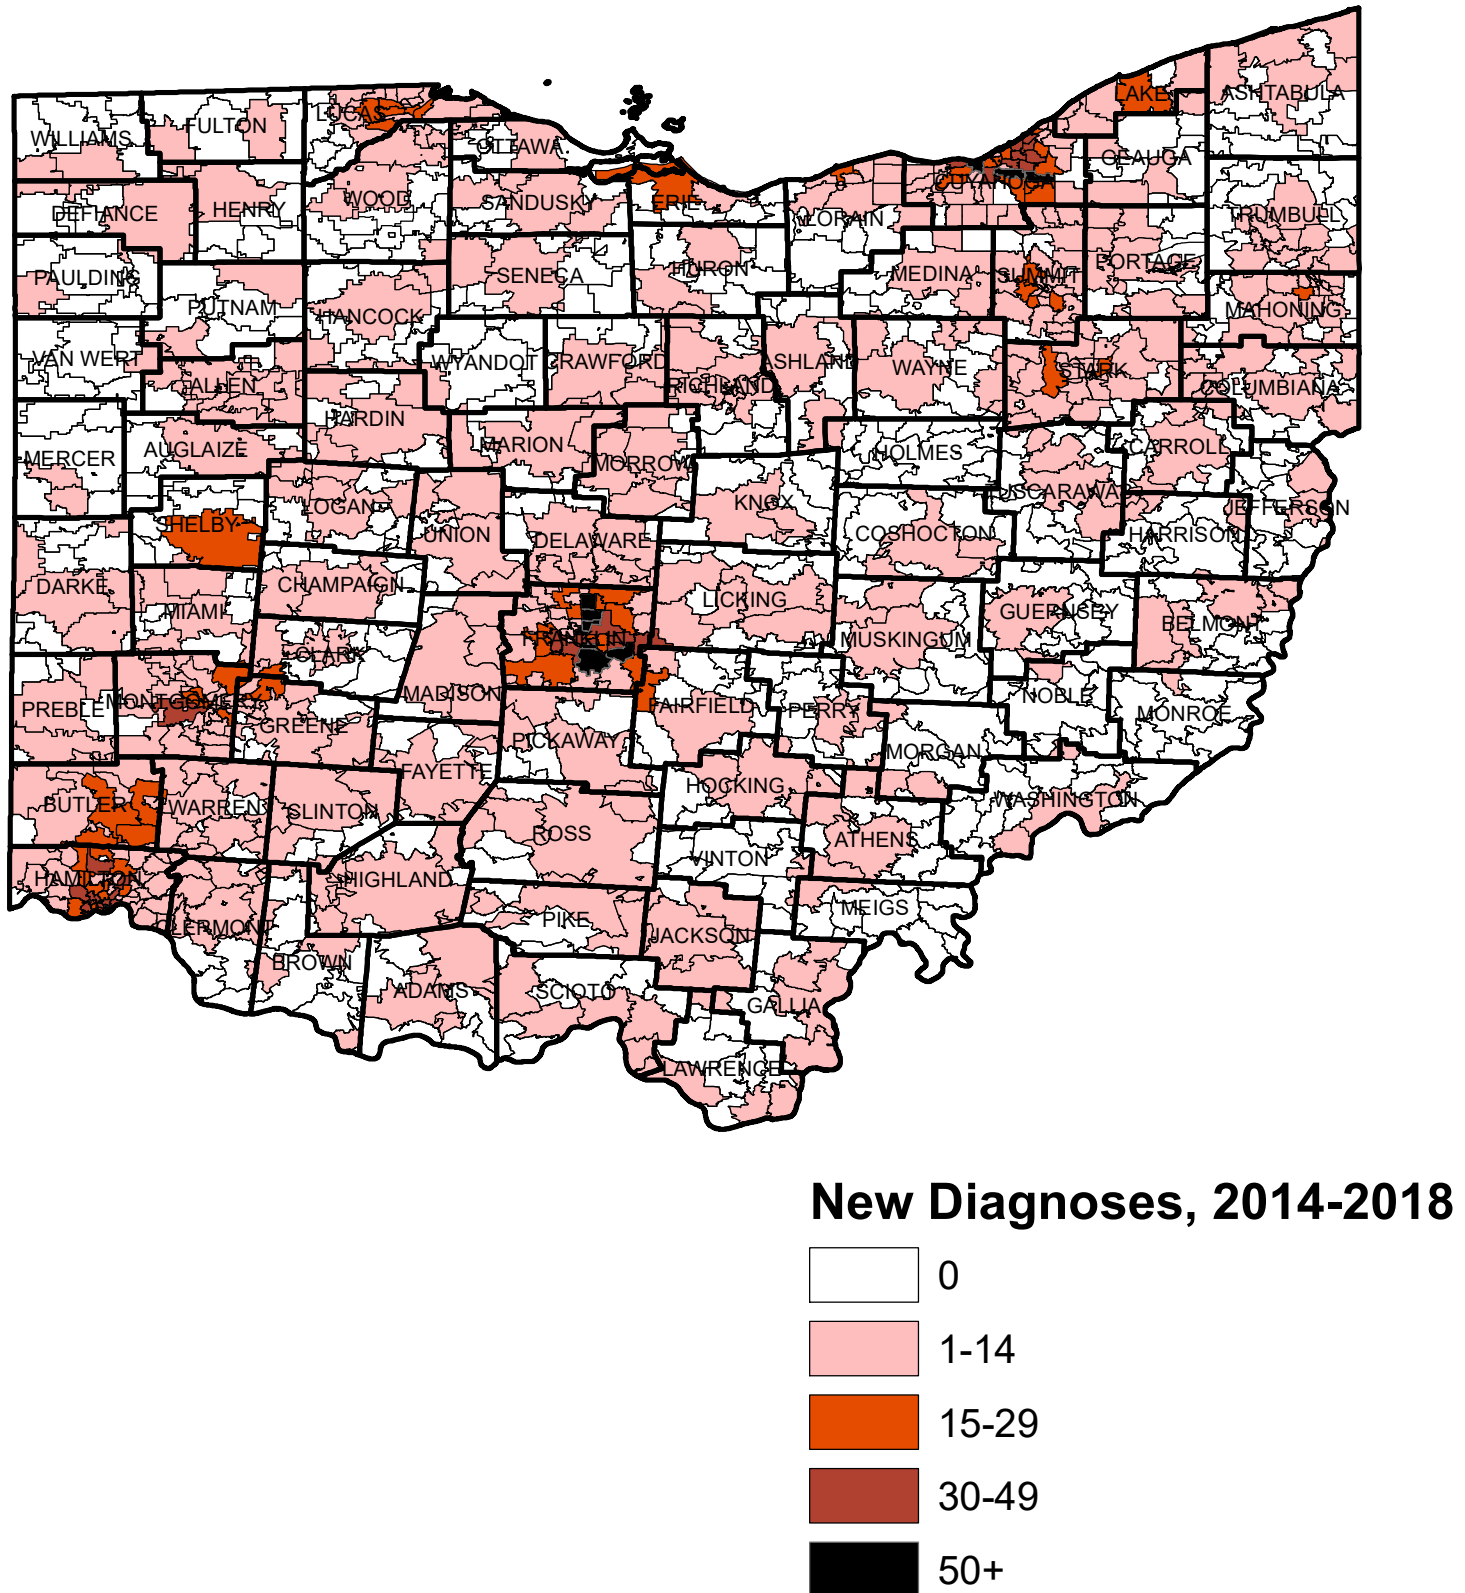

Source: Ohio Department of Health, HIV Surveillance Program. Data reported through June 30, 2019.

Source: U.S. Census Bureau, 2013-2017 American Community Survey 5-Year Estimates.

Number of new diagnoses of HIV infection in 2018 by area-based percent of population with income in the past 12 months below federal poverty level, Ohio, (n=989)

# Reported New Diagnoses of HIV Infection by Zip Code Ohio, 2014-2018

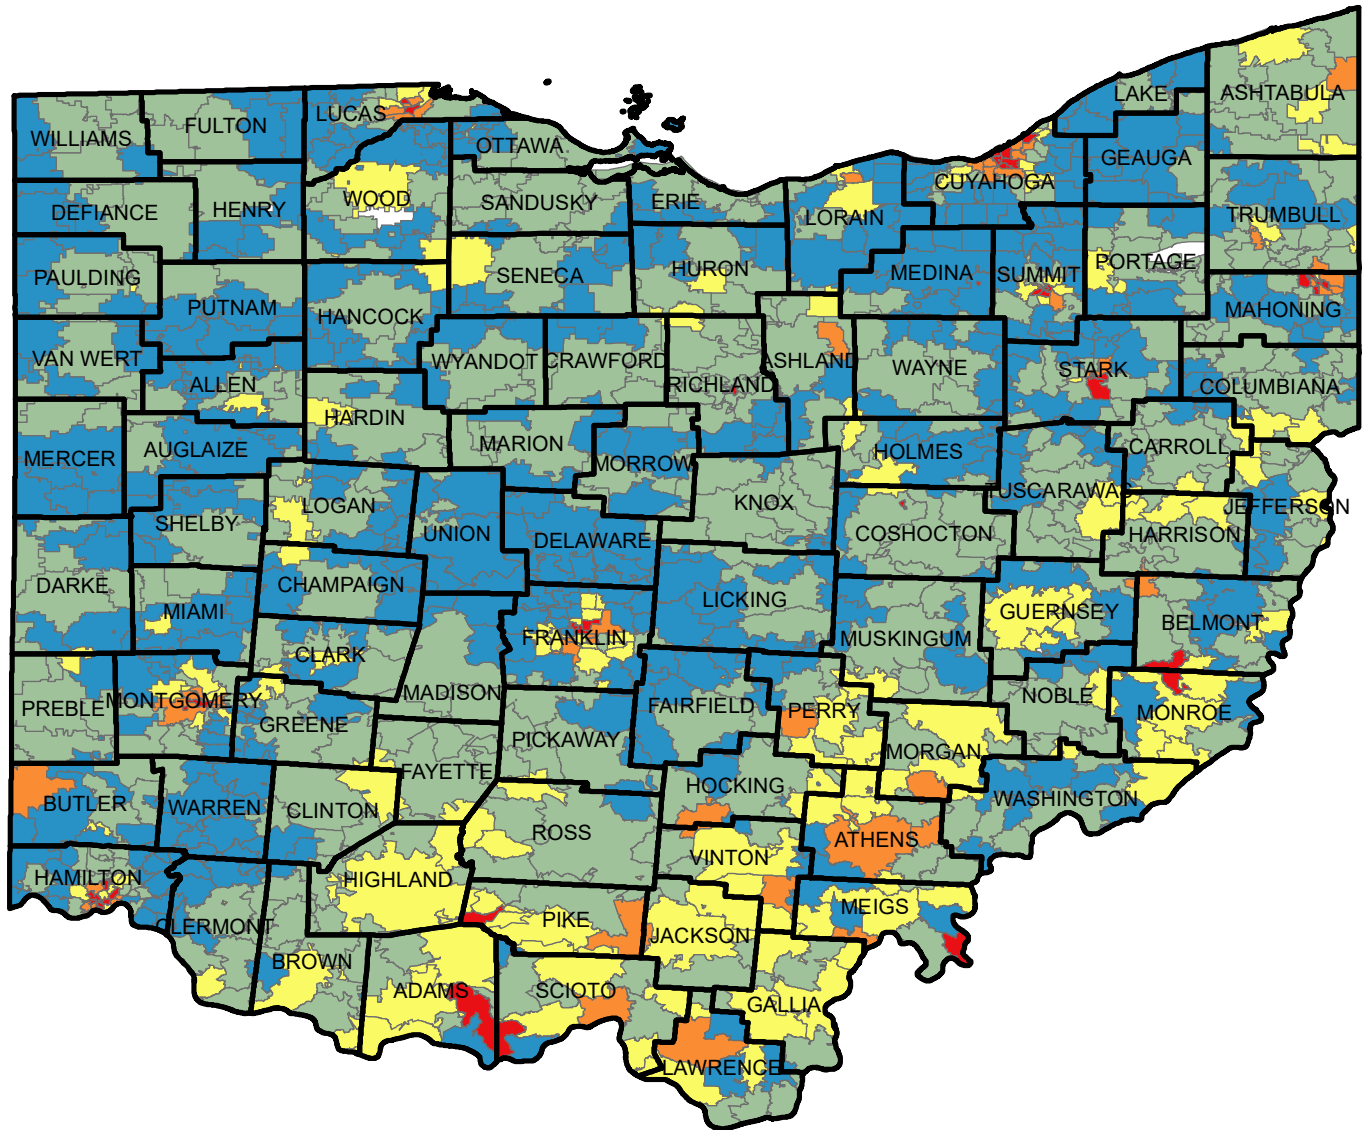

## Notes:

Diagnoses of HIV infection include persons with a diagnosis of HIV (not AIDS), a diagnosis of HIV and an AIDS diagnosis within 12 months (HIV & later AIDS), and concurrent diagnoses of HIV and AIDS (AIDS). Zip code reflects zip code of residence at time of initial diagnosis. Cases diagnosed while in a state or federal correctional facility or whose residence at time of diagnosis is unknown are not included.
