The products subject to recall bear establishment number "P-20214" inside the USDA mark of inspection. These items were shipped to distributors, restaurants and further processing locations nationwide.

The problem was discovered after the firm received a customer complaint on July 27, 2018. The firm investigated to determine the nature of the foreign material complaint and notified FSIS of the findings on Sept. 4, 2018.

There have been no confirmed reports of adverse reactions or injury due to consumption of these products. Anyone concerned about an injury or illness should contact a healthcare provider.

FSIS is concerned that some product may be in consumers' refrigerators or freezers. Consumers who have purchased these products are urged not to consume them. These products should be thrown away or returned to the place of purchase.

FSIS routinely conducts recall effectiveness checks to verify recalling firms notify their customers of the recall and that steps are taken to make certain that the product is no longer available to consumers. When available, the retail distribution list(s) will be posted on the FSIS website at www.fsis.usda.gov/recalls.

Consumers and members of the media with questions about the recall can contact Alan Sterling, Wayne Farms LLC, at (678) 450-3092.
